

Reyniel Polancos

Fresh IT Graduate | Frontend & Mobile App Development

A concise portfolio prepared for journal requirements, highlighting academic background, technical skills, projects, certifications, and career readiness for entry-level developer roles.

Prepared for Portfolio / Journal Submission

Current Status	Fresh Graduate
Target Role	Junior Developer
Focus	Frontend & Mobile App
Location	Digos City, Davao del Sur
Email	reynren11@gmail.com
GitHub	github.com/LuckyYunqi

Document Type	Portfolio Journal
Purpose	Academic / Job Preparation
Prepared By	Reyniel Polancos

Portfolio Summary

This journal portfolio presents my preparation for an entry-level development role through academic background, technical skills, sample projects, certifications, and reflections on professional readiness.

- Primary interest: frontend and mobile app development
- Current learning focus: React JS, React Native, UI consistency, and project documentation
- Career direction: junior developer role where I can contribute, learn, and improve through real work

Career Objective

Objective

To contribute as an entry-level frontend or mobile app developer while strengthening real-world development practices, code quality, collaboration, and user-centered problem solving.

About Me

I am Reyniel Polancos, a fresh IT graduate with a foundation in web design, frontend development, and practical React-based project work. I build clean, responsive interfaces and continue improving through hands-on projects using HTML, CSS, React JS, and React Native.

I have beginner-level practical experience in mobile app development, including React Native app structure, screens, navigation concepts, and connecting user-focused features into a usable interface.

Skills Profile

Frontend	HTML, CSS, React JS
Mobile	React Native
Design / Editing	Photoshop, Premiere Pro, After Effects
Tools	GitHub, VS Code, XAMPP

Technical Readiness

Interface Building	Can create responsive sections, cards, navigation, and contact UI using HTML/CSS/JavaScript
React Foundation	Understands component-based structure and continues practicing React JS and React Native
Mobile Screens	Has practical exposure to React Native screen layouts, navigation ideas, and user-flow planning
Work Habits	Willing to document tasks, accept feedback, improve code quality, and learn development workflow

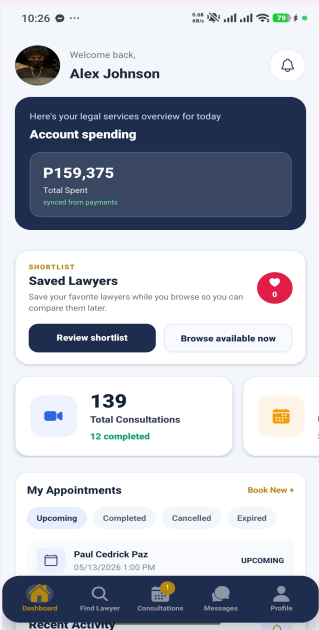

Education

University of Mindanao	College Graduate Digos City, Davao del Sur
University of Mindanao	Senior High School Digos City, Davao del Sur
Holy Cross Academy of Digos	Junior High School Digos City, Davao del Sur
Ramon Magsaysay Elementary School	Elementary Digos City, Davao del Sur

Projects

Lawyer Consultation Mobile App

- Type: Mobile App
- Role: Mobile App Developer
- Tech Stack: React Native, mobile app screens, consultation workflows
- Repository: github.com/xxexil/MobileLex
- Description: A lawyer consultation app focused on schedules, messages, payments, and client-centered consultation flows.

MobileLex dashboard screen

Project Learning Notes

- Improved understanding of how mobile screens connect to user workflows.
- Practiced organizing app features around real user needs such as consultations, messages, schedules, and payments.
- Learned the importance of clear navigation and readable interface hierarchy in mobile applications.

Inventory of Medicines System (IMES)

- Role: Developer / System Contributor
- Tech Stack: Web app, inventory management, reports
- Screenshot unavailable because the system was turned over to the client.

Personal Portfolio Website

- Role: Web Designer / Frontend Developer
- Tech Stack: HTML, CSS, JavaScript
- Responsive portfolio website presenting profile, education, certificates, projects, skills, and contact information.

Responsive Web Design

- Role: Frontend Practice
- Tech Stack: HTML, CSS, accessibility, responsive layouts
- Coursework and practice focused on responsive layouts and mobile-first fundamentals.

Certifications

- Installing and Configuring Computer Systems - TESDA (Completed September 5, 2025)
- Setting Up Computer Networks - TESDA (Completed September 5, 2025)
- Setting Up Computer Servers - TESDA (Completed September 5, 2025)
- Maintaining Computer Systems and Networks - TESDA (Completed September 5, 2025)
- Introduction to CSS - TESDA (Completed September 1, 2025)
- IT Specialist: HTML and CSS - Certiport / Pearson VUE (Completed February 28, 2026)

OJT / Career Preparation

Readiness Statement

I am prepared to enter a real development environment as a fresh graduate who is willing to learn, accept feedback, document tasks, communicate clearly, and improve through daily practice.

- Strengthen React JS and React Native fundamentals through small, complete projects.
- Practice GitHub workflow, code organization, and project documentation.
- Continue improving UI consistency, responsive layouts, and accessibility.
- Prepare for interviews by explaining project role, decisions, challenges, and learning outcomes.

Development Plan

Short-Term Goal	Improve React JS and React Native fundamentals through guided practice and portfolio updates
Portfolio Goal	Document each project with role, tools, features, lessons learned, and available repository links
Workplace Goal	Develop strong habits in communication, task tracking, code review, and accepting technical feedback
Professional Goal	Grow into a reliable junior developer who can contribute to frontend and mobile app development

Professional Strengths

- Willingness to learn from senior developers, instructors, and real project feedback.
- Interest in creating clean, user-centered interfaces for web and mobile applications.
- Ability to continue improving through self-study, hands-on practice, and documentation.
- Prepared to start with entry-level responsibilities and grow through consistent effort.

Reflection

This portfolio represents my current growth as a fresh IT graduate. It shows my academic foundation, beginner-level practical experience, and willingness to continue learning in a company related to my expertise.
